## Profile

A passionate and skilled Software Developer with strong expertise in building scalable web and mobile applications on both the frontend and backend. Experienced in ReactJs, NextJs, Node.js, TypeScript, ReactNative, and Python, with proficiency in Web-Hosting. I bring hands-on experience in developing efficient frontend interfaces, pixel perfect UIs, creating enhanced user experience, securing APIs, and optimizing performance. Presently expanding knowledge in Machine Learning, AI Governance, Ethics and Compliance to contribute to modern yet ethical, fullstack engineering solutions.

## Microsoft Community | Microsoft convention Utaku

July2024–January2025

- Developed interactive UIs for different departments, agencies and partners.
- Developed a seamless customer side development, including designing and maintaining web applications.
- Creating and maintaining apps using Microsoft power apps.

## Lead Software Developer | Complete Computers Institute

March2024–November2024

- Developed robust school management systems for schools.
- Tutored students on networking and web essentials, python and javascript programming and web development.
- Implemented critical system components, including secure payment handling and product management APIs.
- Developed a private multi-dynamic themed UI component library to reduce development time by 30%
- Enhanced system performance by optimizing database queries and implementing caching functionalities, reducing latency by 20%.

## Volunteer Experience Lead Frontend Developer | MyMakaranta

February2022–June2024

- Led the frontend interface design and implementation of key features like user authentication and authorization, transaction processing.
- Developed a cbt system that enhance computer base experience, using Nextjs, Typescript and Tailwindcss to support thousands of learners across Nigeria.

- Participated in outreach programs to educate and promote tech awareness in both urban and rural areas, empowering students to use the platform for skill development.

## Frontend Developer | MeHub

November 2023–December 2024

- Contributed in developing comprehensive Software documentations and other product documents for stakeholders.
- Developed simple yet elegant UIs whilst paying attention to delivering products with elevated user experience capabilities using ReactJS, NextJS, and TailwindCSS.
- Complied to industry best practices and regulations such as; Agile methodologies, clean code practice, SOLID and DRY principles, W3C Standards (WCAG), OWASP Security Guidelines and GDPR Regulations
- Used Git, Github and Gitlab for effective version controlling, seamless CI/CD and maintenance.

## Education

- BSc Physics

University of Jos — December 2023

## Certification

- Responsive Web Design

FreeCodeCamp — March 2021

- Data Structures & Algorithms

FreeCodeCamp — September 2021

- Management & Leadership

Grovo(DisasterReadyOrg.) — January 2025

## Skills & Abilities

- Programming Languages: JavaScript (ES6+), TypeScript, Python, Wolfram Mathematica
- Frameworks/Libraries: ReactJS, NextJS, TailwindCSS, ReactNative, Bootstrap, NativeWind, SASS
- Cloud/Hosting: Digital Ocean, Vercel, cPanel, Cloudinary, AWS
- Tools: Bash, Git, Github, Gitlab, Excel
- Specialized Skills: Technical writing and documentation, Objected oriented programming, saas development, scalable software design and development.
